TECHNICAL SPECIFICATIONS & SCOPE OF WORK:

(A) The work put for bidding is “Design, detailing of all mechanical, Electrical, Piping & Valving including the engineering, supply of equipment at site basis, unloading, handling & storage at site including necessary insurance, erection of all equipment, testing and commissioning as per the specifications in this Bid document for a new sewage treatment plant (STP) as elaborated in the subsequent sections and specifications”. The scope of work will commence from the Bar screen leading to equilisation tank from where the raw sewage water is to be extracted and end with the treated water delivery tank from the treatment plant pipeline. The JNCH will receive the treated effluent water from the STP into treated water tank.

(B) The treated effluent water requirement is 70,000 ltr. / Day. It is expected that this can be recovered from the STP.

I The STP should treat the effluent generated from the toilets, pantry etc, and re-use the treated water for gardening. The treated sewage water should be designed to meet the discharge limits as per the rules stipulated by the Maharashtra State Pollution Control Board, in order to conserve water.

(D) The STP should be designed to ensure that treated effluent characteristics are well below / within the permissible limits, even under varying flow conditions, which are typical for such systems. The selected process should be able to withstand the shock load situation.

I The scope of work should include the installation of bar screen which should be fitted before collection tank and the purpose of which is to filter out

coarse trashy matter from introducing into succeeding units of the treatment plant. Screens should be made of M.S. construction epoxy painted.

- (F) The scope of work should include the raw sewage water lifting pumps from the equilisation sump. The pump should be of the wet submersible type with impeller of SS, casing of SS and shafting of SS with cutter arrangement.

- (G) All interconnecting piping should be of UPVC material of appropriate IS specs. The term piping shall include associated valves, fittings and specials. Wherever pipes are laid above ground, they shall be suitably secured to a pipe rack made of MS epoxy coated.

- (H) Vendor to provide layout drawing of STP along with their quotation to justify their design. Quotation submitted by vendor without this enclosure/information is liable for rejection.

- (I) All the vendors are requested to visit the site of JNCH complex where the plant is to be installed. (Prior to giving bid)

PREQUALIFICATION CONDITION:

1. The Service Provider should have minimum three years of experience in Installation, Testing, Commissioning, operation, repairs & Maintenance of Sewage Treatment Plant.
2. Proof of registration with GST is essential and copies of the proof should be submitted.
3. The service provider should give Bank Guarantee for a value of 10% on contract value.
4. The Service Provider also must have an established service base in Maharashtra.
5. The Service Provider should have sound technical support staff and latest equipments for attending to the complaints within 24 hours.
6. The Service Provider having contract of Sewage Treatment Plant currently running successfully with any Govt. Organization may be given preference. Proof of such Annual Maintenance Contract should be produced.
7. The Service Provider should not be black listed by any PSU banks/Govt. organizations. Self-declaration should be submitted by the authorized official of the company.
