(R.S.NARASIMHAMURTHY)
JOINT DIRECTOR

This laboratory is having different type of sophisticated instruments like AAS instrument, FTIR instruments, GC instruments, Metal analyzer and UV instruments etc. for analysis of samples. There is a frequent power cut in this office on day to day basis. There is an online UPS of 3 KVA capacity to operate these instruments which is insufficient to safe guard the highly sophisticated instruments.

Therefore online UPS of capacity 10 KVA with batteries with 30 min. of power back is urgently required for the safety of above said sophisticated instruments.

If approved we may call the quotations for the same and purchase procedure may be initiated as per GFR rule.

Submitted for approval please.
